

PRESS RELEASE

Attention to flying kites

The Hellenic Electricity Distribution Network Operator (HEDNO) advises you not to fly kites near electricity wires, since there is serious danger of electric shock for you and power interruption in surrounding area.

If your kite is blocked in the wires, then for your safety:

1. Do not try to release it by pulling down the string or using other objects, not even wooden ones
2. Do not try to climb on electrical distribution or lighting poles, nor on other points located near electricity wires.

In case you need help:

- Contact HEDNO faults or
- Contact the police station of your area.

For the rapid restore of possible faults caused by kites, HEDNO will increase its personnel in all its Services all over the country.
