

COMMUNICATION

HEDNO would like to announce to all consumers that due to the temporary reduction of the available electricity capacity at the PPC station in Chania, Crete, due to damage in part of the 150 KV of the station, it became necessary, until the re-inclusion of the units, to plan short, rotating power cuts with a duration of up to 1 hour each, between **12:00** and **16:00** on Friday, 2 July 2021, to ensure the smooth running of the system on the island.

Depending on the progress of re-inclusion of the units, we shall be announcing a new schedule of power cuts, if necessary.

HEDNO would like to apologize for any inconvenience caused and thank its consumers in advance for their active participation in the effort to reduce electricity consumption.

Athens, 2 July 2021
