

COMMUNICATION

Following the announcement to all consumers in Crete regarding the power cuts due to the temporary reduction of the available electricity capacity at the PPC station in Chania, HEDNO would like to add that it became necessary, until the re-inclusion of the units, to plan short, rotating power cuts with a duration of up to 1 hour each, between 18:30 and 22:00 for today, Friday, 2 July 2021, to ensure the smooth running of the system on the island.

HEDNO would like to apologize for any inconvenience caused and thank its consumers in advance for their active participation in the effort to reduce electricity consumption.

Athens, 2 July 2021
