

COMMUNICATION

Scheduled cuts in Attica

HEDNO would like to announce to all consumers that today, 6 August 2021, alternate electricity cuts have been scheduled to take place in Attica, following relevant order issued by IPTO. These cuts are necessary to ensure the preservation of the production/demand balance and the smooth operation of the electricity system in the mainland.

HEDNO will make the best of efforts to properly update all citizens.

During these cuts, HEDNO is asking all consumers to:

- Avoid using elevators as they may be trapped inside.
- For safety reasons, all citizens are warned that electricity may be activated again at any time. All electrical appliances and devices shall therefore be treated as constantly under voltage.

Finally, all citizens are reminded that between peak hours **13:00-15:00** and **18:00-22:00**, they must:

- Avoid using electric devices (washing machines, kitchen stoves, water heaters etc.) and try using them during off-peak hours instead.
- Set the air conditioner temperature at 26 degrees.

The reasonable use of these devices during these extreme weather conditions will significantly contribute towards energy saving and towards avoiding any electricity problems by ensuring all citizen's health and safety as well as the best services provided.

HEDNO would like to apologize for any inconvenience caused and thank its consumers in advance for their active participation in the effort to reduce electricity consumption.
