

ANNOUNCEMENT

Announcement on the progress of the restoration works at the Electricity Distribution Network in areas that have been affected by the fires

HEDNO continues informing and updating the public, and would like to announce that today, **Thursday, 12 August 2021**, works for the restoration of the massive-scale damages that have been caused at the Electricity Distribution Network due to the fires that broke out across the country are continuing.

More specifically, according to the data released by the **Central Greece Region Department of HEDNO**, in Northern Evoia and the areas of Limni, Mantoudi and Agia Anna, reconnection to electricity has been completed to a great extent. Reconnection is pending for 7 locations and a few individual customers. Similarly, in the areas of Istiaia and Aidipsos, reconnection has also been completed to a great extent and it is still pending for 2 locations and a few individual customers. We would like to stress that for all respective areas in Northern Evoia, power generators have been installed at all major pump stations, in coordination with the Regional and Municipal Authorities.

According to the data released by the **Peloponnese-Epirus Region Department of HEDNO**, in Pyrgos and more specifically, the area of Archaia Olympia, reconnection has been completed. In Sparti, and more specifically in the area of Eastern Mani, 96% of the accounts have been restored while the villages of Sidirokastro, Myrsini, Lygera, Konakia, Polyaravos and Krini are still disconnected. However, today we are expecting reconnection of Marathea and Platanos and until tomorrow, for the rest of Agios Vasileios. Please note that in this area, the network has suffered extensive damages at locations which are not easily accessed while efforts to transport power generators are ongoing. In Tripoli, and more specifically in the area of Gortynia, reconnection has been completed at 30%. More specifically, the villages of Raches, Lykochori, Tripotamia, Kapellitsa, Chranoi and Fanaraki have been reconnected. Reconnection is still pending for Chora, Neochori, Livadaki and the villages of the old Municipality of Loutra Iraias (Chrisochori, Iamatikes Piges, Loutra, Litharos, Agioneri, Parnassos, Ochthia, Pyrris, Agios Ioannis of Archaia Iraia, Lotis, Liodora and Katraki). Efforts are made to transport power

generators to this areas in order to connect them to electricity as soon as possible.

Finally, according to the data released by the **Attica Region Department of HEDNO**, reconnection to electricity for the areas of Attica that were affected by the fires has been achieved at 99%.

You are reminded that for the quick and safe reconnection of all affected accounts, citizens are advised to check the cable line of the general panel of the property and the HEDNO meter for damage indications, such as black spots or insulator burstings. If they do find such indications, they must immediately call an electrician, who shall check and repair the cable, if necessary.
