

HEDNO: The reconnection of all lower-income households has been completed

By Saturday, December 22, 2018, HEDNO swiftly completed the reconnection of lower-income households, in the framework of the additional funding deposited by the Ministry of Environment and Energy to the special reconnection account.

More specifically, following the deposit by the Ministry of the additional funding of 3.2 million euro to the special reconnection account, HEDNO proceeded within the space of a few days to reconnect electricity in 880 households, ensuring the restoration of power supply until the holidays.

It should be noted that the total number of lower-income households with their electricity reconnected in the past months is over 3,800.
