

HEDNO

Announcement

Latest HEDNO update on the restoration of the electricity supply in the areas affected by the snowfall.

HEDNO, in the context of providing continuous updates to the public regarding the electricity supply problems caused by the snowstorm “Barbara”, would like to inform that, at this time, almost all the damages to the Network of the areas affected have been restored.

More specifically, all damages have been restored in Attica while the works in Grammatikos will be concluded within the next few hours.

In Thessaly, Sporades and Evia, all the damages that were reported since this morning have been restored, with the exception of some mountain settlements in the Municipality of Dirfys-Messapia, where access was impossible.

In addition, during the last hour, damages have been reported in the areas of Martino and Tragana of the Municipality of Lokri, in the areas of Kastro and Akraifnio of the Municipality of Orchomenos, as well as in Aliartos, where crews are working for their swift restoration.

No problems from the snowstorm are reported in the Electricity Distribution Network in the rest of Greece.

Please note that citizens can contact HEDNO by telephone at the free-of-charge line 8004004000 and/or report any power supply problems via the MyDEDDiE application from their mobile phone (Android and iOS) or via a computer at the HEDNO website Online Fault Report (deddie.gr).
