

Press Release

Safety instructions for kite flying

The Hellenic Electricity Distribution Network Operator (HEDNO) advises that you not fly your kite near power lines, due to severe risk of electric shock and outages in the area.

For your safety, if your kite gets caught in a power line, please:

1. do not attempt to retrieve it by pulling the string or by using other objects, including wooden objects
2. keep off scaffolding or power distribution and electric lighting poles, including spots near power lines

If you need help, you must:

- contact HEDNO fault reports:
 - at 800 400 4000 and 11500 (Support & Fault Reporting)
 - via the MyDEDDIEApp
 - via the online fault report service www.deddie.gr

or

- contact your local Police Station

To ensure quick fault repairs caused by kite flying, HEDNO will book extra staff for all of its Services across the country.
