

HEDNO

Communication

On the occasion of "Daniel" storm that sweeps across the country, HEDNO would like to inform consumers that power supply problems are currently still in progress mainly in Volos, Pelion and other areas in the prefecture of Magnisia as well as in Sporades.

The intense weather conditions and the flash floods have caused widespread damage at the electricity grid in these areas. The entire technical staff at HEDNO and its partner companies remain alert since the outbreak of the phenomenon but are struggling to restore the damages due to the adverse weather conditions at the affected areas.

HEDNO warns all citizens to avoid contact with conductors, poles or other grid components that have fallen on the ground or bear damages, and immediately report any damages to 800 400 4000 or the nearest Police Station.
