

ANNOUNCEMENT

Providing continuous information to the public regarding the power supply problems that occurred yesterday Friday, August 16th 2019 around 21:40 in some areas of Skiathos, HEDNO would like to clarify that its crews detected a fault on a Medium Voltage line in the underground land network of the island near Skiathos Palace Hotel; they promptly isolated the fault and started the restoration of power supply for the customers that were affected through the second Medium Voltage supply line of the island.

Thanks to their prompt response, the power supply was restored in the affected part of Skiathos town by midnight and by 1:20 in the early morning of 17th of August in the rest of the areas.

HEDNO's crews continue to work hard in order to repair the fault in the Medium Voltage line by this afternoon, in order to ensure capacity for continued emergency power supply.
