

ANNOUNCEMENT

HEDNO would like to announce that all crews are still working hard to reach and restore all damages that have been caused at the Network in Vilia, Attiki, as well as nearby settlements since yesterday afternoon due to weather conditions.

Restoration works are extremely challenging due to difficulties in accessing the road network. HEDNO is up until now making efforts, with assistance provided by the Army and the General Secretariat for Civil Protection, to approach the area, restore damages and reconnect the electricity network.
