

## ANNOUNCEMENT

Following the announcement to the public for the restoration works on the damages that have been caused due to bad weather conditions at the electricity Network in central Evia, HEDNO would like to announce that power supply has been restored across all of the central lines of the urban network.

However, HEDNO's crews continue the works up until this hour, in order to ensure that several individual damages in the areas of the beach of Avlida and Eretria have also been restored. The greatest damages have been detected in an area outside Vasiliko, where due to the fall of poles, 30 homes have been cut from power supply, in the area of Bourtzi, where similarly the fall of poles has also affected a small number of homes and in the area of Kamaritsa where just a while ago the road was opened and a crew is expected to arrive for establishing the extent of the damage that has been caused.

Regarding the villages of Theologos, Georintaw, Pournos, Skounteri, Mistros, Mavropoulo, Pissonas and Vatontas, the crews of HEDNO are still there and have started the gradual reconnection of power supply, while the work will also continue tomorrow during very early morning hours with extra technical staff in order to ensure faster restoration for all damages.

HEDNO would like to once again express its condolences to the families of the victims.
