

ANNOUNCEMENT

HEDNO would like to inform all consumers that the progress of the works for the restoration of damages at the Electricity Distribution Network at areas afflicted by cyclone Ianos, as of today, Tuesday, 22 September, is as follows:

In Kefalonia, the areas of Pesada, Agia Thekla Palikis and Fiskardo were reconnected to electricity, and at this moment, works continue for the reconnection of Agia Afimia.

In Zakynthos, the works continue for the restoration of isolated damages at the Low Voltage network.

In Ithaki, works have continued at the northern part of the island, where, it is reminded, most problems are presented due to the large number of trees that have fallen on the Network, while the area has been reconnected to supply up to the village of Stavros.

In Karditsa, the difficult task of water pumping is still ongoing while the reconnection of 5 substations at the center of the city is still pending, with HEDNO crews having managed to reconnect 109 substations.

The enhanced crews of HEDNO at all afflicted areas are still working hard in order to complete the restoration of all serious damages at the Electricity Distribution Network until this evening.
