

ANNOUNCEMENT

HEDNO would like to announce that all crews continue throughout the night the works for the reconnection of 5 Medium Voltage lines at parts of the areas of Dionysos, Agios Stefanos, Kefalari, Politeia, Politeia, Glika Nera, Ekali and Nea Erithrea.

Please note that this morning, the total number of houses with electricity problems was 70,000. At present, 60,000 houses and businesses have been reconnected. Since this morning, the entire workforce of HEDNO, approximately 400 persons, has been at the areas in Attica afflicted by the bad weather. This shall be enhanced with 25 extra crews (approximately 60 persons) that will join in from the Region of Peloponnese, Epirus and Central Greece, since in these areas damages due to Medea have been restored.

Besides, in Northern Evia, which was severely affected by the phenomenon, works for the restoration of Network damages shall be completed within the next few days and at the last 4 settlements.

HEDNO would like to ask all citizens to be cautious when detecting damages to the Network (fallen cables, poles etc.) to stay away and not intervene. We would also like to ask all citizens who continue to have electricity issues at the areas that were afflicted with damages due to the bad weather, to contact the company to examine individual cases of damage, by phone to 11500 or 2111900500, via the MyDEDDiE app for Android and iOS from their mobile or via the HEDNO website [Online Damage Report Form](https://deddie.gr) (deddie.gr).
