

ANNOUNCEMENT

HEDNO would like to announce that currently all works at the Medium Voltage Network in Attica are being completed and that only small parts of the lines that have been damaged due to the fall of trees are still to be restored mainly in the Northern Suburbs, while works are also in progress for the restoration of damages at the Low Voltage network as well as individual problems.

The works are focusing in Ekali, Dionysos, Agios Stefanos, Krioneri, Anoixi, Drosia and Kalamos.

HEDNO would like to ask all citizens to be cautious when detecting damages to the Network (fallen cables, poles etc.) to stay away and not intervene. We would also like to ask all citizens who continue to have electricity issues at the areas that were afflicted with damages due to the bad weather, to contact the company to examine individual cases of damage, by phone to 11500 or 2111900500, via the MyDEDDiE app for Android and iOS from their mobile or via the HEDNO website [Online Damage Report Form](https://deddie.gr) (deddie.gr).
