

ANNOUNCEMENT

HEDNO would like to announce that works for the complete restoration of the damages at the Medium Voltage Network in Attica are continuing and parts of the lines that had problems until this morning due to the fall of trees have been reconnected to electricity in the areas of Ekali, Dionysos, Agios Stefanos, Krioneri, Anoixi, Drosia and Kalamos.

It is estimated that the total number of houses dealing with electricity problems is currently 7,000.

HEDNO would like to ask all citizens to be cautious when detecting damages to the Network (fallen cables, poles etc.) to stay away and not intervene. We would also like to ask all citizens who continue to have electricity issues at the areas that were afflicted with damages due to the bad weather, to contact the company for the examination of individual cases of damage, by phone to 11500 or 2111900500, via the MyDEDDiE app for Android and iOS from their mobile or via the HEDNO website [Online Damage Report Form](https://deddie.gr) (deddie.gr).
